EXPERIENCE

Klaviyo - Senior Software Engineer, Marketing

April 2022 - Feb 2023 | Boston, CO (Remote)

Joined a team of 6 other engineers, building and maintaining the company's marketing site, Klaviyo.com, a Gatsby/React site connected to headless Wordpress backend with a GraphQL interface.. I provided technical direction and mentorship on the JavaScript side, and architected a shared component library within a monorepo for the Marketing design system.

Technology: React.js, Gatsby, Wordpress, GraphQL, Styled Components

Tools: Figma, GitHub, GitHub Actions, GitHub Packages, Monday

Spectrum Charter - Senior Software Engineer

August 2017 - November 2021 | Greenwood Village, CO

As part of small, cross-functional teams, built tools (e.g. shared libraries and development platforms) and proof-of-concept web apps in primarily Vue.js, but React and Angular too, to both help redesign a range of digital products and facilitate the work of the engineering teams. Also, about 15% of my time was motion design, in JavaScript or After Effects.

Technology: Vue.js, Vuex, React, Angular, Webpack, Sass, GSAP, Lottie

Tools: Sketch, Gitlab CI/CD, Jira, Adobe Suite

Athlinks - UX Engineer

September 2016 - August 2017 | Louisville, CO

A technology company focused on endurance racing. I did almost all of the front-end development across about four teams/products, mentoring other developers on React and JS best practices. Some products were web-based, some hardware, all exclusively in React. About 20% of the time was design and user-research.

Technology: React.js, ES6(Babel + Webpack), Sass, SVG, AWS

Tools: Sketch, Adobe Suite, Invision, Git, Version One

Sequence - Front-End Web Developer

June 2015 - May 2016 | San Francisco, CA

An agency, where I was on a four-person dev team. Half of my work was ongoing, collaborative site maintenance/enhancements for Chipotle, and half were building new apps that I primarily owned. As I owned most of

SKILLS & TOOLS

JavaScript: React, Gatsby, Vue, Redux/Vuex, GSAP, Webpack, Rollup, Lottie/Bodmovin, Async Workflows, Express

CSS: SASS/LESS, Styled Components, Animations

PWA: Cache Strategies, Offline Rendering

REST API Integration, GraphQL

Agile Tools: Jira, VersionOne, Monday

Design Tools: Sketch, Figma, After Effects, Illustrator, Photoshop

EDUCATION

M.S. Stem Cell Biology University of Minnesota

2010-2012

B.S. Biology Ferris State University

2007 - 2010

GOAL

I love JavaScript and building beautiful interfaces. I would love to find a place to apply that passion to solving a greater problem with other passionate people.

my projects, I became versed in interacting and collaborating with designers. Also spent time formally mentoring interns. **Clients:** Chipotle, Chevron, Medtronic, Facebook.

Technologies: Angular, React.js, jQuery, Gulp, Browserify, Sass, PWA, AWS, GSAP

Tools: Adobe Suite, Jira, Git,

Viscira - Associate Web Developer

June 2014 - May 2015 | San Francisco, CA

A design agency, where I collaborated with UI designers to do the front-end of websites built on Drupal, and HTML emails.
